

Rishal KV

MERN STACK DEVELOPER

📞 +91 7907392365 | ✉️ rishkv923@gmail.com | [in LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFILE SUMMARY

Passionate MERN stack developer skilled in JavaScript, React.js, Node.js, Express.js, and MongoDB. Committed to writing clean, maintainable code and continuously expanding knowledge. Driven by a desire to contribute to cutting-edge projects, eager to gain diverse industry experience in crafting modern web applications alongside talented teams.

TECHNICAL SKILLS

Programming Languages	: JavaScript, TypeScript
Frontend Technologies	: HTML5, CSS3, Tailwind CSS, Shadcn, React.js, Next.js, Redux, Zustand
Backend Technologies	: Node.js, Express.js, MongoDB, Mongoose, Clean Architecture
Deployment	: AWS EC2, AWS Route53, Nginx, Vercel, Coolify, Docker
Tools and Libraries	: Git, GitHub, Webpack, Babel, Swagger, Postman, Multer, Nodemailer
Integrations	: JWT, React OAuth2 — Google, Socket.IO, Cloudinary, Stripe, Razorpay
Familiar With	: Data Structures and Algorithms, MySQL

MAIN PROJECTS

Clubwize — Social Media Application

[🌐 Live Link](#)

Clubwize is a social media application designed for business organizations where users can create clubs and nodes (similar to groups) and develop modules within them such as rules, debates, and issues to facilitate organizational communication and collaboration.

- Developed the frontend using **Next.js** with **Shadcn** components for a modern and responsive UI.
- Implemented **Zustand** for efficient state management across the application.
- Built a robust backend using **Nest.js** for scalable API development and service integration.
- Created functionality for users to establish clubs, create nodes, and develop various module types.
- Designed the system to support business organizational needs with focused discussion spaces.

Repairst — Gadget Repair Platform

[🌐 Live Link](#)

Repairst is a comprehensive gadget repair service platform designed to streamline the device repair process for users. The application allows customers to easily book repair services for tablets and smartphones.

- Developed the frontend using **Next.js** with responsive design for seamless user experience across devices.
- Built robust backend services with **Express.js**.
- Implemented intuitive UI for users to select device brands and specific repair services (broken glass, battery replacement, etc.).
- Utilized **MongoDB** for data persistence and **Zustand** for state management.
- Implemented user authentication with **JWT** and role-based access for customers and technicians.

MINI PROJECTS

Dutz — E-Commerce Application (Dates & Nuts)

[🌐 Live Link](#)

- Developed a full-fledged E-commerce application for purchasing dates and nuts using **Next.js**.

- Owned complete backend development using **Node.js** and **Express.js**, designing scalable REST APIs.
- Handled end-to-end API integration on the frontend, ensuring seamless communication between client and server.
- Implemented global state management using **Zustand** for cart, product, and order workflows.
- Integrated **Shiprocket** API to identify and assign delivery partners during order processing.

Traveloop — Tour Packages Website

 [Live Link](#)

- Developed a static tour packages website using **Next.js** for fast performance and SEO optimization.
- Implemented smooth and interactive animations using **GSAP** to enhance user experience.
- Designed structured sections to list and showcase travel packages clearly and attractively.
- Focused on responsive layout and modern UI to ensure compatibility across devices.

Zaitoon Campus — School Website with CMS

 [Live Link](#)

- Developed a dynamic school website using **Next.js** for the frontend.
- Integrated **Strapi CMS** as an admin dashboard to manage website content efficiently.
- Enabled non-technical staff to update pages, announcements, and media through the CMS.
- Implemented API-based content fetching from Strapi to the Next.js frontend.
- Ensured responsive design and optimized performance for all devices.

Figleaf — Static Business Website (Uniform Manufacturing Company)

 [Live Link](#)

- Developed a static corporate website for a uniform manufacturing company serving multiple industries.
- Designed structured sections to showcase services including corporate, healthcare, hospitality, and industrial uniforms.
- Built with **Next.js** focusing on performance, SEO optimization, and fast loading.
- Implemented clean UI/UX to highlight company offerings, process workflow, and client portfolio.
- Created responsive layouts ensuring seamless experience across desktop and mobile devices.
- Integrated contact and enquiry sections for lead generation and business communication.
